

SolventClean BE3

High-boiling solvent cleaner

Properties

- Highly effective at removing residues of inks, printing inks, adhesives and resins
- Low emission: Flash point according to DIN EN 22719-A: 65 °C
- label-free
- distillable

Application

SolventClean BE3 is a high-boiling solvent-based cleaner. Specially developed for softening and removing all types of contaminants such as printing inks, resins, adhesives, polyurethane, various greases, etc. Can be used with various tools and in immersion baths. The product is miscible with water.

Instructions for use:

Always test on a less visible area first.

Suitable surfaces: steel, stainless steel, aluminium, aluminium alloys, galvanized material, non-ferrous metals

Only treat after testing: Plastics

Area of application: manual process, immersion process

For removing: water- and solvent-based paint systems

Dosing

Immersion process

Concentration	100 %
Temperature	15-30 °C

Technical data

Density (20°C)

0,98 kg / l

Notes

Store the product in its original container.

Storage should be frost-proof, although the solidified products can be used again after thawing without any loss of quality.
