

BÜFA-Clean Glass conc.

Highly effective glass cleaner concentrate

Properties

- reinforced with ammonia
- Gentle cleaning
- For streak-free cleaning of all glass and plastic surfaces
- universally applicable

Application

BÜFA-Clean Glass Conc. is used as a liquid cleaning concentrate for streak-free glass and window care. It can be used as a concentrate or in dilution for gentle cleaning of all glass surfaces such as windows, mirrors, car windows and all smooth plastic surfaces in vehicles or office equipment and appliances. Another area of application is the addition as a cleaning additive in windshield washer systems. BÜFA-Clean Glass Conc. can be mixed with water in any ratio. The cleaning solution/concentrate is applied with a sponge or spray bottle and then wiped off with a squeegee, cloth or chamois leather. When using for the first time or as a concentrate (even highly concentrated solutions), carry out a test application in a concealed area to check the compatibility of the material.

Manually (sponge): 1:20 to 1:100 diluted with water
In the spray bottle : as a concentrate or diluted up to 1:10 with water
Windshield washer system: 1:10 to 1:20 diluted with water

Technical data

Density (20°C)	pH-value
1,00 kg / l	9,5 - 10,5

Notes

Only store the product in the original container and in a frost-free place.
Direct sunlight should be avoided.
After removing partial quantities, the container should be resealed.
The surfactants contained in the product meet the conditions regarding biodegradability as specified in Regulation EC 648/2004 for detergents.
The product does not contain any organic complexing agents that are not sufficiently biodegradable, e.g. EDTA (according to Annex 49 of the Waste Water Ordinance).
Due to the formulation components used, no organically bound halogen compounds (AOX) are contained as active substances.
