

Lizerna White

Neutral fat solvent

Properties

- special grease-dissolving formulation for every wash
- effective from 40 °C
- versatile use as an emulsifier, wetting agent and washing power booster in all washing systems
- achieves a particularly high degree of whiteness

Application

Lizerna White can be mixed with water at any ratio, remains low viscous and does not go through a gel phase. A significantly increased degree of whiteness can be achieved even at low temperatures. Even at 40°C, Lizerna White achieves good grease removal, which, however, improves significantly with increasing temperature.

The product can be added manually or via laundry-typical liquid dosing systems. It is suitable for pre-washing as well as for the removal of extreme soil as an additive in the main wash.

The recommended dosage depends on the application. When used as a grease remover or laundry booster, the dosage table below should be observed.

Dosing	Degree of contamination		
	Water hardness	light	middle
0 - 8.4	2	4	8
8.5 - 14	4	8	10
> 14	8	10	15

The application quantity refers to g / kg dry laundry.
You can find out the degree of hardness or water hardness in degrees of German hardness from your local water company.

Dosing

Wetting agent	
Concentration	2 - 3 g / kg dry laundry

Emulsifier for heavily pigmented laundry	
Concentration	15 - 20 g / kg dry laundry

Technical data

Density (20°C)	pH-value
1,00 kg / l	7,5

Notes

Storage should be frost-proof, although the solidified products can be used again after thawing without any loss of quality.
