

Complement K 3475

Additive for aqueous, caustic cleaners

Properties

- Has an anti-foaming effect
- extends the service life of contaminated cleaning baths
- Improves emulsification
- Improves the cleaning effect, especially when using hard water

Application

Complement K 3475 is a VOC-free additive for modifying aqueous, alkaline cleaners from the Paintex and AniClean series. The cleaning result when using hard water is significantly improved by the addition of Complement K 3475. The service life of contaminated washing baths is extended due to the special emulsifying properties of Complement K 3475. In the application concentration, the wash bath modified by Complement K 3475 is foam-free above 40 °C. The optimum addition of Complement K 3475 depends on the type and strength of the soiling and the local water hardness.

Instructions for use:

Re-dosing: To compensate for cleaning bath evaporation and carry-over, it is recommended to add a mixture of Complement K 3475/aqueous, alkaline cleaner periodically or continuously to the cleaning bath used.

Dosing

Machine Applications

Concentration	1 %–5 %
Temperature	40 °C – 80 °C

Technical data

Density (20°C)	pH-value
1,06 kg / l	11

Notes

Store the product in its original container.

Storage should be frost-proof, although the solidified products can be used again after thawing without any loss of quality.
