

BÜFA-Clean Eco

Mildly alkaline cleaner concentrate

Properties

- for all cleaning processes
- Wide range of applications
- with backloss effect
- phosphate-free

Application

BÜFA-Clean Eco is an alkaline cleaning concentrate for use with high-pressure devices and other cleaning methods. It thoroughly but gently removes even stubborn dirt such as road grime, oils, greases, hydraulic oils, etc. BÜFA-Clean Eco is used as a pre-spray and intensive cleaner in automatic commercial vehicle washing systems. Other areas of application include general cleaning work in workshops and car washes, as well as industrial cleaning. BÜFA-Clean Eco is fast-separating, i.e. oils and greases are separated after a short standing time in the oil separator. Without an emulsion splitting system, favorable residual oil values are achieved in the waste water. BÜFA-Clean Eco can be mixed with water in any ratio. The cleaning concentration depends on the degree of soiling of the vehicles, surfaces and parts to be cleaned. For automatic dosing and necessary pre-dilution, follow the instructions of the equipment manufacturer. After cleaning, rinse thoroughly with clean water to remove all cleaning agent residues and dissolved dirt. When using for the first time, carry out a test application in a concealed area to check the compatibility of the material.

Operational cleaning: 1:10 to 1:100 diluted with water

Manual cleaning: 1.0 - 2.0 %

Washing systems: depending on the system

Pre-spray/spray process: 1:1 to 1:50 diluted with water

HD/HW devices: 0.1 - 2.0 % (at the nozzle)

Technical data

Density (20°C)	pH-value
1,01 kg / l	11 ; 1 %

Notes

Only store the product in the original container and in a frost-free place.

Direct sunlight should be avoided.

After removing partial quantities, the container should be resealed.

The surfactants contained in the product meet the conditions regarding biodegradability as specified in Regulation EC 648/2004 for detergents.

The product does not contain any organic complexing agents that are not sufficiently biodegradable, e.g. EDTA (according to Annex 49 of the Waste Water Ordinance).

Due to the formulation components used, no organically bound halogen compounds (AOX) are contained as active substances.
