

Lizerna Active Green

Ecological washing power booster

Properties

- Based on renewable raw materials
- Distinct fat and protein dissolving power
- Very good complexation of iron, manganese and copper
- Very good dispersing properties

Listings

EU-Ecolabel listed

Application

Lizerna Active Green is a non-foaming washing performance enhancer that is also suitable for washing machines that work without water softening equipment due to its high content of water hardness binding substances. Lizerna Active Green is non-foaming at both low and high temperatures and is therefore well suited for use in steam-heated washing machines and car washes. The natural complexing agents used prevent catalytic damage caused by iron, copper or manganese ions during bleaching with Lizerna OX and ensure a high dispersing capacity, which prevents re-greying even with high dirt loads.

Dosing Water hardness	Degree of contamination		
	light	middle	heavy
0 - 8.4	1	2	3
8.5 - 14	2	3	4
> 14	3	4	5

The application quantity refers to g / kg dry laundry.
You can find out the degree of hardness or water hardness in degrees of German hardness from your local water company.

Technical data

Density (20°C)	pH-value
1,24 kg / l	12,5 ; 1 %

Notes

Only store the product in the original container and above 5°C.
After removing partial quantities, the container should be resealed.
Due to the natural substances used, there may be a visible dark cloudiness in the lower part of the container. This turbidity has no influence on the washing performance of the product.
