

SECASENE Neo Brush

Brushing agent

Properties

- specially adapted to the properties of SENSENE™ Neo
- easy to rinse out and leaves no graying on the brushing areas
- excellent for heavily soiled goods as an additive to the pre-cleaning bath

Application

SECASENE Neo Brush is brushed pure onto the soiled areas of the textiles.

When using the Jet-Clean technology, the product must be diluted with SENSENE® Neo (1:5). When using water in the pre-spotting process, ensure that there is a sufficient base concentration of cleaning booster in the liquor to prevent localized greying.

Pre-spotted garments should be cleaned in the machine after a contact time of 30 minutes at the latest. Much longer exposure times can lead to material damage.

Take care when using on delicate fabrics. In case of doubt, especially if color fastness is suspected, a hem test should be carried out.

Technical data

Density (20°C)	pH-value
0,81 kg / l	7

Notes

Only store the product in its original container and in a frost-free place.

The product is not sensitive to frost, but becomes viscous if stored below 0 °C for longer periods. After warming up, however, it can be used again without any loss of quality.
