

Lavenium TP

Carpet cleaner for spray extraction devices

Properties

- excellent pigment removal and soil suspending properties
- free of optical brighteners
- also readily soluble in cold water
- suitable for all types of machines

Application

Lavenium TP has been developed especially for use in spray extraction machines for cleaning color- and water-resistant carpets and upholstered furniture. Its good emulsifying properties also enable it to remove oily and greasy soil. Lavenium TP is pre-foamed. Foam may only occur in the dirty water of carpets that are shampooed frequently. However, this foam can be easily eliminated by Foam Ex. Lavenium TP is added to the water in the detergent tank of the cleaning machine. In general, 200 - 300 ml are sufficient for 10 l of water. In case of heavy soiling and high water hardness, it is recommended to increase the dosage slightly.

Technical data

Density (20°C)	pH-value
1,04 kg / l	8,5 - 9,5

Notes

Store the product in its original container.

Storage should be frost-free, although the solidified products can be reused without loss of quality after thawing.
