

Innenreiniger MV

Alkaline intensive cleaner concentrate

Properties

- Universally applicable for cleaning vehicle interiors
- Fast and powerful effect
- Especially for heavy soiling
- for manual and machine applications

Application

Innenreiniger MV is a material-friendly, caustic alkali-free, intensive cleaning concentrate for the complete interior cleaning of large vehicles (buses, road and rail vehicles) and cars. In the field of office/building cleaning, it is used for cleaning and maintaining doors, walls, ceilings, floors, plastic surfaces and sanitary areas. Due to its low-foaming properties, it is also suitable for machine application in addition to manual cleaning methods.

Innenreiniger MV can be mixed with water in any ratio. The dilution depends on the soiling of the surfaces to be cleaned. The cleaning solution is applied using a sprayer, sponge or cloth and after a short exposure time, cleaning agent residues and the dissolved dirt are thoroughly rinsed off with clear water and left to dry. When using for the first time, carry out a test application on a concealed area to check the compatibility of the material.

Dosing

Manual cleaning

Concentration	1:10 bis 1:40 in proportion with water

Technical data

Density (20°C)	pH-value
1,05 kg / l	10,0 - 11,0 ; 1 %

Notes

Only store the product in the original container and in a frost-free place.

Direct sunlight should be avoided.

After removing partial quantities, the container should be resealed.

The surfactants contained in the product meet the conditions regarding biodegradability as specified in Regulation EC 648/2004 for detergents.

The product does not contain any organic complexing agents that are not sufficiently biodegradable, e.g. EDTA (according to Annex 49 of the Waste Water Ordinance).

Due to the formulation components used, no organically bound halogen compounds (AOX) are contained as active substances.
