

BÜFA-Clean Star-Wash

Neutral shampoo with shine drying effect

Properties

- Highly concentrated, antistatic surfactant combination
- the dirt is dissolved quickly and effectively
- Gives glossy paint surfaces and streak-free windows
- for brush washing systems and manual applications

Application

BÜFA-Clean Star-Wash is a shampoo concentrate with a self-drying effect for use in automatic vehicle washing systems. The use of an additional drying aid is generally not necessary. BÜFA-Clean Star-Wash can be mixed with water in any ratio. Depending on the application method and degree of soiling, a premix is prepared, which is sprayed manually or with a suitable spray or high-pressure device from bottom to top onto the vehicles to be cleaned and reworked with a sponge or brush. Then rinse thoroughly with high pressure if possible. If pre-dilution is necessary, follow the instructions of the system/device manufacturer. After cleaning, rinse thoroughly with clear water. Vehicles cleaned with BÜFA-Clean Star-Wash dry off after rinsing by simply leaving them outside the car wash or by letting the airflow dry them without leaving any stains or streaks.

Manual cleaning: 1:50 to 1:200 diluted with water

HD/HW appliances: 0.2 - 2.0% at the nozzle

Brush washing system: depending on the system (25 to 100 ml per wash cycle)

Technical data

Density (20°C)	pH-value
1,02 kg / l	7,5 ; 1 %

Notes

Only store the product in the original container and in a frost-free place.

Direct sunlight should be avoided.

After removing partial quantities, the container should be resealed.

The surfactants contained in the product meet the conditions regarding biodegradability as specified in Regulation EC 648/2004 for detergents.

The product does not contain any organic complexing agents that are not sufficiently biodegradable, e.g. EDTA (according to Annex 49 of the Waste Water Ordinance).

Due to the formulation components used, no organically bound halogen compounds (AOX) are contained as active substances.
